

# OVERCOMING THE NOVEL CORONAVIRUS EPIDEMIC

## KANI CITY COUNCIL EMERGENCY DECLARATION

First of all, we would like to express our gratitude to all citizens for your comprehension and cooperation regarding the measures against the Novel Coronavirus infection spread and local medical institutions, for their invaluable cooperation.

Despite all efforts to contain the virus spread, new cases have been reported almost on a daily basis, impacting the local health-care capacity. Data show that young people (10 ~ 30 years old) and foreign residents are driving the latest spike.

Considering that Kani city has been promoting the “multicultural coexistence”, it is important that we all share the same “crisis awareness” and work together as one “All Kani” to overcome this epidemic.

In light of the situation above, we would like all citizens to mind the following:

- 1 . Any form of bias and discrimination damage not only the body/mind of the victim, but compel him/her to hide symptoms and avoid cooperation regarding contact tracing. Furthermore, inability to track infected person’s close contacts, results in a further spread of the virus, making it more difficult to contain the infection.  
Please do not discriminate or be biased against infected people.**
- 2 .Infection precautionary measures taken by each and every one of us contribute to prevent the virus spread in the city. Please avoid any infection high risk situations, such as gatherings and parties/reunions, mainly in places that are not taking proper measures. Strictly follow the basic precautionary measures guidelines: wear a mask at all times, whether indoors or outdoors; disinfect hands, avoid crowds and keep social distancing.**
- 3 .The most efficient way to extinguish the ongoing coronavirus is through the vaccine. The city is accepting vaccination reservations according to central government vaccine supply. Please take this opportunity to be immunized.**
